

The image shows a vertical section of a wall or partition made of plasterboard. The plasterboard is light-colored and shows significant signs of fire damage. Two specific areas are highlighted with red dashed circles. The upper circle is labeled 'Fire side plasterboard (Pb1) open-up' and shows a large, irregular hole where the plasterboard has been torn away, revealing a dark, charred interior. The lower circle is labeled 'Fire side plasterboard (Pb1) fall-off' and shows a large area where the plasterboard has crumbled and fallen away, leaving a rough, uneven surface. The background shows a red metal frame and some blue equipment, suggesting a laboratory or industrial setting.
